MULTIPLY THE AMOUNT OF GOLD YOU OWN... WITHOUT SPENDING ONE THIN DIME

At present an opportunity exists—a *fleeting* opportunity—in the hard asset markets that is unlikely to be repeated in the foreseeable future. If you own gold, you simply must take advantage of this opportunity now in order to add to your gold holdings with no out of pocket expense.

A Changing World

The world was enormously different just over 5 years ago. The U.S. stock market was healthy, the dollar was strong, real estate was on a tear and there *seemed* to be no threat to prosperity.

We don't have to tell you that today investors face a very different set of circumstances. The stock market has shown us repeatedly that it can go down just as effortlessly as it goes up—and with little warning. A strong dollar is a but a distant memory at this point and, though it may appear to have stabilized recently, it is tough to see a scenario in which the dollar won't come under more sustained pressure due to our growing national debt, as well as our trade and budget deficits.

The only thing that is constant in the financial world is change.

For instance, the price of gold is constantly changing, largely due to the factors described above. Gold has recently set new all-time highs. But many investors don't know the most cost-effective methods for maximizing their returns from gold without sacrificing safety and security.

Fortunately, by using a proven gold trading strategy, you can put the constant changes to work for you to increase your gold holdings and maximize your security at the same time.

An Important Turning Point in the Market

Three potent, elementary forces in the gold market have come together to set up an appealing situation that may not be repeated for years. Best of all, if you already possess gold bullion, the convergence of these three factors enables you to utilize an established investment technique to substantially increase the amount of gold that you own—without reaching for your wallet or checkbook.

The Market for Liberty Double Eagle Gold Pieces

The Liberty Double Eagle gold piece was the backbone of commerce in America from 1850 to 1907. This large coin contains just under an ounce of solid gold mined in America a century ago, or even longer. Most importantly, it is estimated that 98% of the Liberty Double Eagles originally minted are forever lost, making these coins truly scarce gold investments today.

Liberty Double Eagle

Mintage Run: 1850-1907
Gold Content: .9675 ounces
Original Face Value: \$20

There are three main factors that influence the investment performance of Liberty Double Eagles:

- ❖ the price of the Double Eagle itself...
- ❖ the price of gold...
- ❖ the difference between the price of gold and the price of the Double Eagle, also known as its “premium.”

As this Park Avenue special report goes to press, the Liberty Double Eagle in MS63 grade has arrived at an key place in its investment record. All three of the factors are simultaneously signaling a cyclical trading opportunity.

In this newsletter, we will demonstrate for you how important this opportunity is for you and how you can use \$20 Liberties to considerably boost your gold holdings with no out of pocket expense.

To summarize, the MS63 Liberty Double Eagle’s price has soared in recent years to \$2,275. *But its premium is far less than its all-time high*, because the price of gold has rallied to its highest levels ever and is now selling for \$1,246 per ounce.

The Price of Gold Bullion

As world events and macroeconomic conditions develop, the price of gold will continue to climb higher, as several fundamental factors appear to be supportive of higher gold prices going forward:

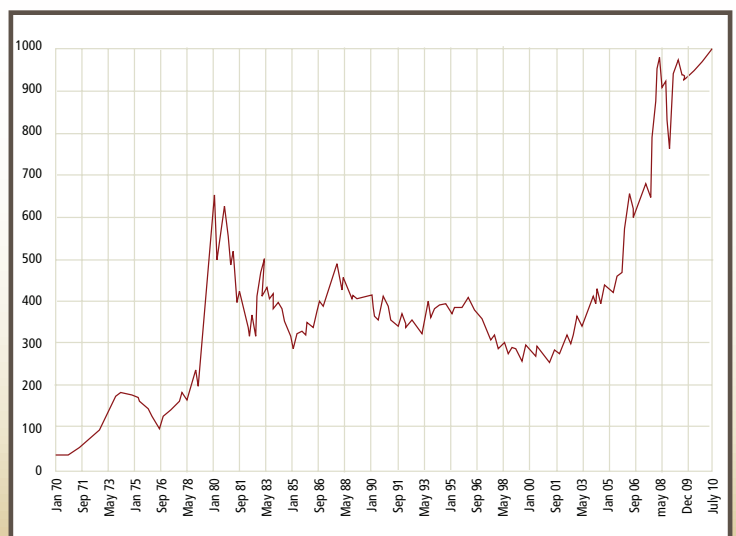

1. The dollar will continue its decline. Gold is negatively correlated with the U.S. dollar and America’s large trade and budget deficits will force the recently strengthening dollar back into its long-term decline, setting the stage for higher gold prices.

2. With the huge level of debt and no apparent means of paying it back, other than inevitably firing up the printing presses, inflation is bound to make a comeback. Evidence of higher inflation is starting to appear. By the time the U.S. government’s “rear-view mirror” inflation gauges, the Consumer Price Index (CPI) and Producer Price Index (PPI), have begun flashing warning signs inflation, it will already be too late for investors to take action. Gold investments are first and foremost hedges against periods of high inflation.

3. The stock market is on shaky ground once again, with the Dow recently closing below 10,000 in a period of extreme volatility. In the wake of the bear market that hit stocks in 2000-2001 and especially in 2008-2009, investors have learned the lessons of diversification and will increasingly look to investments that are negatively correlated with stocks—like gold coins.

4. World tensions remain with us and will haunt the financial markets and the economy for the foreseeable future. Tensions continue throughout the Middle East and the threat of terrorism has turned into a permanent factor for investors to consider. Gold is one of the few investment categories that can actually rise during periods of tension. Gold is a form of financial insurance that investors cannot do without in today’s more dangerous world.

Gold Price 1976-2010

The Price of Liberty Double Eagles

Liberty Double Eagles in Mint State 63 (MS63) condition are now trading at \$2,275.

Solely on the basis of their recent performance, as well as their hefty gold content, they are a tremendous buy right now.

Furthermore, when compared to modern bullion coins, such as the Krugerrand and the Gold American Eagle, independently graded MS63 Liberty Double Eagles are quite rare. They number only in the thousands, as compared to the millions of bullion coins that are minted each and every year.

The Liberty Double Eagle Premium

The most astonishing statistic, however, that seems to signal that investors should act now to take advantage of this trading strategy to increase their gold holdings is the fact that the premium over gold value for MS63 Liberty Double Eagles is now low.

This means that the three most important measures—the price of gold, the price of the Double Eagles and the Double Eagle premium—have reached exceptionally advantageous buying levels simultaneously.

The potential repercussions of this occurrence are undeniably compelling. The price of the Liberty Double Eagle is always fluctuating in relation to gold bullion coins like Krugerrands, American Eagles, Vienna Philharmonics and Maple Leafs. Today the ratio between the price of MS63 Double Eagles and gold bullion is 1.82 to 1. That means you can acquire a Liberty Double Eagle for about the same price as 1.82 gold bullion coins.

On the other hand, there have been times in the past when the ratio has gone higher than 4 to 1. In other words, that same Liberty Double Eagle would cost you 4 or more bullion coins.

You can actually use the movements in this price ratio to literally multiply the amount of gold that you own.

Increase the Amount of Gold You Own... With No Out-Of-Pocket Expense

Obviously, the secret to increasing your gold holdings without spending any additional money is to take advantage of the shifts in the price ratio between gold bullion coins like the Krugerrand, Vienna Philharmonic and Gold American Eagle and gold-rich rare coins like the Liberty Double Eagle.

This method is easy and—most importantly—completely private. You won't have to reach for your wallet and, over the ensuing months and years, you could see a significant increase in the amount of gold you own.

Here is How You Should Do It

There are only two simple steps to effectively using this strategy to your advantage:

1. Trade your gold bullion coins for Liberty Double Eagles when the ratio between the two is 3.25 to 1 or lower. At these times, the Double Eagles are undervalued relative to gold bullion. That is the exact situation that exists now. You should trade your bullion for Double Eagles right away.
2. Convert your gold holdings back into gold bullion when the ratio rises to 3.25 to 1 or higher. At these times, the Double Eagles are overvalued relative to gold bullion, so they can fetch more gold than you started with in the first place.

Now is an ideal time to get started. The ratio between the MS63 Liberty Double Eagle and the price of gold is now at 1.82 to 1—compared to an all-time high of 4.43 to 1.

Keep in mind that each Liberty Double Eagle contains nearly an ounce of pure gold, so when you trade your bullion coins for them, you still preserve the protection of intrinsic value that only gold investments can supply.

Double Eagles are also perhaps the definitive gold privacy guardian. You can make a swap of gold bullion for these rare coins without any government reporting requirements. Moreover, the sale of rare coins, like Double Eagles, are not subject to any broker reporting requirements. Perhaps most importantly, as collectible coins, Double Eagles are not subject to presidential gold confiscation powers, which still exist by law. In contrast, gold bullion coins are subject to presidential gold confiscation orders, such as occurred in 1933 under President Franklin D. Roosevelt.

There is no way to know how long the current attractive ratios are going to last. **We are convinced that investors who take advantage of this opening now will reap benefits and increase the amount of gold they own when the ratios move ahead.**

By that time, if you have not already suitably situated your gold portfolio, it will be too late. **Put this powerful strategy to work immediately.**

| YEAR | RATIO | SCENARIO | STRATEGY |
|------|-------|--|---|
| 1979 | 2.0 | \$5,260 in Krugerrands=5 Liberty Double Eagles | You own 10 Krugerrands. Bid value=\$5,260 Trade them for 5 Liberties |
| 1982 | 4.2 | \$8,190 in Liberties=21 Krugerrands | You own 5 Liberties. Bid Value=\$8,190 Trade them for 21 Krugerrands |
| 1984 | 3.0 | \$7,686 in Krugerrands=7 Liberties | You own 21 Krugerrands. Bid Value=\$7,686 Trade them for 7 Liberties |
| 1989 | 4.43 | \$12,320 in Liberties=31 Krugerrands | You own 7 Liberties. Bid Value=\$12,320 Trade them for 31 Krugerrands |

HOW TO INCREASE THE AMOUNT OF GOLD YOU OWN WITHOUT SPENDING ONE THIN DIME

At times you can acquire an MS63 Liberty Double Eagle for the same price as 2 gold bullion coins, like The Krugerrand

Sometimes you can trade a single Liberty Double Eagle for 4 bullion coins, such as Krugerrands

STRATEGY RULES

1. When the price ratio between Double Eagles and gold bullion coins such as the Krugerrand is 3.25 or lower...trade the bullion coins for Liberties

2. When the ratio increases above 3.25...trade Double Eagles for Krugerrands or other bullion coins
